## Notice

7.11.2023

All information in this documentation may be changed without warning, and it does not represent an obligation on the part of the manufacturer.

All material in this documentation and the programs it concerns are protected by copyright legislation and the specially entered Agreement concerning usage rights and maintenance. All rights to this material are the property of Visma NextGen AB. Any copying or duplication of the material in this document, including but without limitations, text, screen appearance, icons, or methods, is prohibited.

As a part of its continuous development of the system, Visma NextGen AB may change the composition of packages, modules and functions. Visma NextGen AB waives any responsibility for any errors or omissions in the system, apart from what is clearly described in the current Agreement on usage rights and maintenance. Use of the system on other computers than the system it is licensed for is illegal and will be reported to the police and compensation will be claimed.

---

## Introduction

This document includes information about new and changed features, fixed issues, and known issues and limitations in the latest version of [Visma.net](#) ERP.

We recommend that you read through the document so that you are familiar with the changes that have been made in this version before you start using it.

Please note that this document refers to the UK English version of [Visma.net](#) ERP.

## API - Due dates for breaking changes

---

---

Release Notes.	Documentation	Deadline
<b>Deprecated fields on Account endpoint</b>	<p>Following fields are deprecated and will be removed on 20th of February 2024:</p> <ul style="list-style-type: none"><li>- ExternalCode1</li><li>- ExternalCode2</li><li>- AnalysisCode</li></ul> <p>They should be replaced by fields: ExternalCode1Info, ExternalCode2Info, AnalysisCodeInfo, which contain more details.</p>	feb. 20, 2024
<b>Planned removal of VNI authentication method</b>	<p>We are planning to phase out VNI authentication method by the end of 2023. ISVs should register their (existing) integrations in the Developer Portal and use Connect authentication instead before the stated end date.</p> <p>Benefits of this change:</p> <ul style="list-style-type: none"><li>- One preferred method of authentication across Visma.net ERP portfolio</li><li>- Better security using scopes</li><li>- Let customer be more in control (customer grants access explicitly)</li></ul> <p>More information for ISVs on how to migrate existing integrations and/or setup new integrations can be found in the international developer community: <a href="https://community.visma.com/t5/News-in-Developers-Visma-net/Visma-net-ERP-APIs-are-now-available-for-Visma-Connect/ba-p/542148">https://community.visma.com/t5/News-in-Developers-Visma-net/Visma-net-ERP-APIs-are-now-available-for-Visma-Connect/ba-p/542148</a></p>	dec. 31, 2023

---

---

**Planned removal of  
Sales Order API  
endpoints**

We plan to be functionally complete by Q2-2024 (30th of June 2024), thus new due date being end of Q4-2024(31st of December 2024). If any change would occur for this, we will announce that as soon as possible, dec. 31, 2024

A number of Sales Order API endpoints will be removed as a part of the transition to the next generation ERP.

The following API endpoints will be removed:

GET /controller/api/v1/salesorder/{orderNbr}  
GET /controller/api/v1/salesorder/{orderType}/{orderNbr}  
GET /controller/api/v1/salesorder/{orderType}/{orderNbr}/rotrut  
GET /controller/api/v1/salesorder  
GET /controller/api/v1/salesorder/{orderType}/{orderNbr}/commissions  
POST /controller/api/v1/salesorder  
POST /controller/api/v1/salesorder/{saleOrderNumber}/action/cancelSalesOrder  
POST /controller/api/v1/salesorder/{salesOrderNumber}/action/reopenSalesOrder  
PUT /controller/api/v1/salesorder/{orderNbr}  
GET /controller/api/v1/salesorderbasic/{orderNbr}  
GET /controller/api/v1/salesorderbasic/{orderType}/{orderNbr}  
GET /controller/api/v1/salesorderbasic  
POST /controller/api/v1/salesorderbasic  
PUT /controller/api/v1/salesorderbasic/{orderNbr}  
POST /controller/api/v2/salesorderbasic  
POST /controller/api/v2/salesorder  
POST /controller/api/v2/salesorder/{saleOrderNumber}/action/cancelSalesOrder  
POST /controller/api/v2/salesorder/{salesOrderNumber}/action/reopenSalesOrder

All functionality currently missing in the new Sales Order Service API will be added before these endpoints are removed. The list of affected endpoints will also be extended, so pay attention to future updates.
