

O2C

Release Notes.	Documentation
Description of VAT code visible on invoice lines	You can now see the description of the VAT code in the Sales invoices (AR301000) and Customer invoice (SO303000) windows, on the VAT details tab so that it's easier to understand which VAT code is selected on the invoice lines.
Wrong dunning letter fee for Norway in template	Earlier, the maximum dunning letter fee set as default in the Customer ledger preferences (AR101000) was too high. It has now been corrected to meet the rates set by the government.

Accounting Modules

Release Notes.	Documentation
Side panel functionality available for seeing relevant information without navigating between screens	The Side panel functionality is now available and accountants can use it to see relevant information on customers, items, suppliers etc. without having to navigate to different screens. For the moment this functionality will be activated for specific customers only.
