

Visma.net HRM

Add Document API

Version 0.8
Revision date: 1/Aug/2021

Introductie

Visma.Net.HRM heeft een reeks API's beschikbaar voor integratie met systemen van derden.

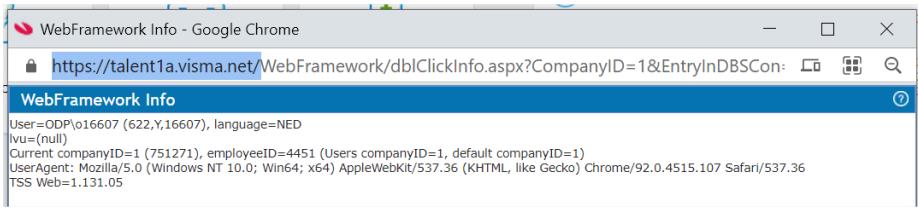

Ben je klant en ben je geïnteresseerd in het bouwen van een integratie, neem dan contact op met visma.nl.projectenbureau@visma.com of je Customer Success Manager.

Leveranciers kunnen contact opnemen via onze website: <https://www.peple.nl/apis>

De werking van de API

Authentication

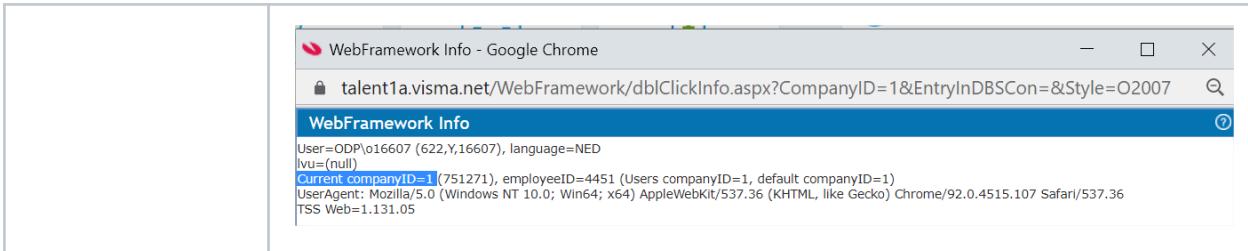

All calls will need a valid cookie. To get a Valid Cookie (gsID) you need to call Login.aspx.

	Login.aspx
URL	<p><a href="https://<customername>Talent.net">https://<customername>Talent.net</p> <p>Example: https://talent1a.visma.net/WebFramework/Login.aspx</p> 
Method	POST
Description	This will return a valid cookie. (gsID)
FunctionID	N/A
Parameters	eMailAddress: Email address of the ServiceUser password: Password of the ServiceUser
Sample Call	<pre>{ "eMailAddress": "x@y.z", "password": "something" }</pre>
Sample Results	<pre>{ "gsId": "x-y-z-r-t" }</pre>

Failed login	If the login is not successful a 4xx or 5xx error will be returned and the connection terminated.
--------------	---

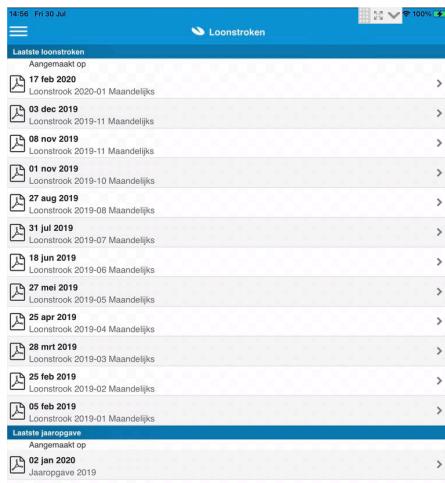

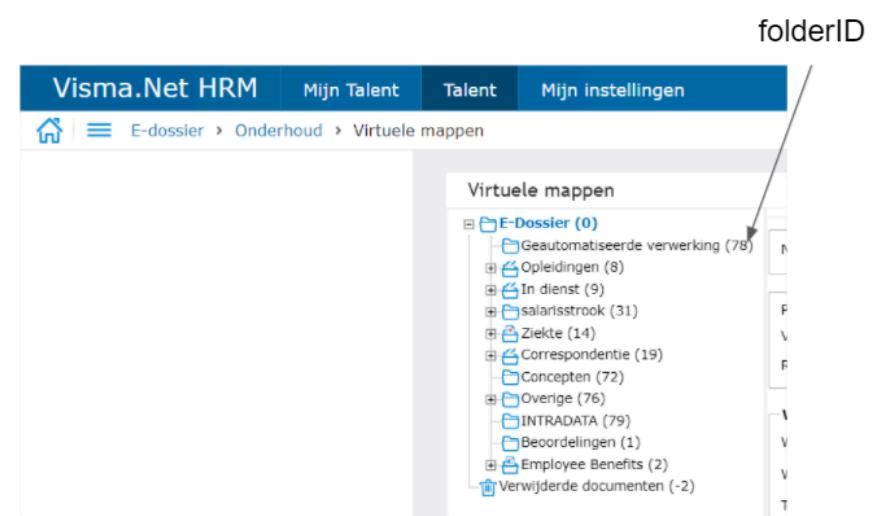

NP.Visma.OnDemand.AddDocument

	NP.Visma.OnDemand.AddDocument' (ImportID=25)
URL	<p><a href="https://<customername>Talent.net/GenImport/PostReceiver.aspx/NP.Visma.OnDemand.AddDocument">https://<customername>Talent.net/GenImport/PostReceiver.aspx/NP.Visma.OnDemand.AddDocument</p> 
Description	<p>Add documents</p> <p>Add document accepts the document to be stored as an attachment or as inline base-64 encoded, the return on successful completion is the commID.</p> <p>Document size is restricted by the size limit imposed on the webserver for uploading file</p> <p>You can post multiple documents in one POST by repeating the element 'document' for each one to add.</p> <p>Posting size restrictions still apply and the returned commID is only from the last added document, errors are also just 'one only'.</p>
Method	POST Text in body (Content type = Text/Json)
FunctionID	PAY.31431 (New Payroll – Document Imports) The webservice uses the permissions of the ServiceUser to upload the document.
Parameters	
companyID	companyID in the customers database (also specified on the URL during POST)

Parameters in Body

userID	<p>The system checks authorisation against the ServiceUser for authorisations not this UserID.</p> <p>If the UserIDDis specified it specifies in edossier as the UserID who uploaded the document, otherwise the ServiceUser is the user shown as the user who uploaded the document</p> <p>You must use one of</p> <ul style="list-style-type: none"> • the domainname\loginname • the talent UserID • the user email address. (recommended)
employeeID	For which employee to store this document
description	Description to add as meta data to the document, maximum 254 characters.
docType	<p>The document type.</p> <p>The values can be: payslip, annual, standard</p> <p>22 = "Digitale Loonstroken", 31 = "Beoordelingen", 32 = "Indicaties", 34 = "Officiële Documenten", 36 = "Ziekte", 37 = "Opleidingen", 38 = "Detacheringen", 39 = "Begeleid werk", 40 = "Activiteiten", 41 = "Verstrekkingen", 42 = "Web Ziekte", 23 = "Jaaropgaves", 47 = "Arbeidsongeschiktheid"</p> <p>Type #22 and #23 will be shown in the App.</p>

	
extReference	Metadata stored with the document, maximum 254 characters. (not mandatory)
docName	Name and extension (extension can be used to display an icon for a document)
folderID	<p>Target folder to store the document.</p> <p>folderID</p> 
commType	Accepts one of the following options: phone, print, fax, scanner, eMail or general
direction	Accepts one of the following options incoming or outgoing
isSigned	Accepts one of the following options yes or no
returnEmpName	Specify which employee display name from the empName table to return as the contents of 'employeeName', if 0 or not specified does not return a

	name (4=Lastname, Initial and 6. Lastname, Firstname)
docDate	date to use as 'creation date' for the document
docBase64	document contents base64 encoded if not send as attachment.
Sample Call	HTTPS://targetwebserver/GenImport/PostReceiver.aspx/NP.Visma.OnDemand.AddDocument?companyID=1 Body <pre>{"Document": {"userID": "joebloggs@visma.com", "EmployeeID": "100", "Description": "Contract amendment v10", "ExtReference": "AAABBB", "Docname": "JoeBloggsContractV10.docx", "ReturnEmpName": "1", "FolderID": "1", "CommType": "print", "DocType": "36", "direction": "incoming", "isSigned": "no", "DocDate": "2019-11-12T11:18:32", "DocBase64": "doc converted to base 64"}}</pre>

Diagram illustrating the mapping of fields from the 'Beoordelingen' table to the 'Add Document' API parameters:

field	description

Configuratie aan klant kant.

Klant URL

Elke klant heeft een unieke URL voor toegang tot de API's. Met deze URL kunnen de API's worden aangeroepen nadat het ServiceUser-account is aangemaakt en geconfigureerd.

The screenshot shows two windows side-by-side. The top window is a web application titled 'marielle-kuijpers-vis Demo Talent Payroll'. It has a sidebar with several items: 'Help voor deze pagina [F1]', 'Inhoudsopgave Help', 'Service Center', 'Menu vernieuwen', 'Informatie over Talent' (which is highlighted in blue), and 'Info'. The bottom window is a Google Chrome browser window titled 'WebFramework Info - Google Chrome'. The address bar shows the URL: 'https://talent1a.visma.net/WebFramework/dblClickInfo.aspx?CompanyID=1&EntryInDBSCon:'. The main content area of the browser displays 'WebFramework Info' with the following details:
User=ODP\o16607 (622,Y,16607), language=NED
lvu=(null)
Current companyID=1 (751271), employeeID=4451 (Users companyID=1, default companyID=1)
UserAgent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/92.0.4515.107 Safari/537.36
TSS Web=1.131.05

ServiceUser Account

Het ServiceUser-account heeft een e-mailadres en wachtwoord. Deze wordt aangemaakt door de klant.

De Applicatiebeheerder zal de ServiceUser voor HRM moeten activeren in de Admin-module van Vismaweb.
