Visma Easycruit release notes

February 2024 (Part 2)

Youforce SSO upgrade (NL) (live)

Purpose and scope

After the release of the new Youforce SSO we've done an upgrade based on user feedback.

Description

After solving the session timeout issue that caused Youforce users to shut down their browser, we've upgraded the new SSO even more by connecting the EasyCruit session timeout to the Youforce session timeout. If a user now receives a session timeout in EasyCruit, we'll check if the user's Youforce session is still active. If the answer is yes, EasyCruit will start a new session for the user and the user will be able to continue working in EasyCruit. Only after a Youforce session timeout has occurred, the user will also be logged out of EasyCruit.

Interview date column (live)

Purpose and scope

We wanted to create a better overview in the applicant list for our users and display the interview dates of candidates.

Description

Interview date has been added as a column to the column editor in the vacancy applicant list. Just like the other columns in the column editor you can select/unselect, drag and drop the interview date column and create your preferred applicant list view.

Workflow

1. Click on the column editor in the vacancy applicant overview.

[≡↕↕ Column editor ∨]

2. Select the interview date column and drag it to the desired position.

☑ Average Rating ⠿

☐ Last Updated ⠿

☐ Age ⠿

☐ Screening (%) ⠿

☑ Interview date ⠿

☐ Category ⠿

3. The column will appear in your list view.

Average Rating ∨	Interview date ∨
	14/02/2024*
	31/01/2024*

New counties Norway (NO) (live)

Purpose and scope

Norway has divided some of its counties into new counties. These changes have been processed in the EasyCruit dropdown menus.

Description

The following county (region in EasyCruit) changes have been made:

Viken --> Østfold, Akershus and Buskerud

Vestfold og Telemark --> Vestfold and Telemark

Troms og Finnmark --> Troms and Finnmark

The old regions are not visible in the EasyCruit dropdowns anymore and replaced by the new regions. This has the following consequences:

- For existing vacancies that have selected one of the old regions in the past, we've replaced those by the new regions. E.g. a vacancy that had selected region Viken will now display the three new regions Østfold, Akershus and Buskerud.
- For existing candidates that have selected one of the old regions in the past, we've looked at the city value that they had selected and changed the region to the region corresponding with the city. E.g. a candidate has selected region Viken and lives in Askers kommun, so their region will be replaced by region Akershus. If no city had been selected we've left the region field empty. A recruiter can always edit the candidate details if needed and enter the correct new region.

Extra duration slots for new interview booking (live)

Purpose and scope

Based on customer feedback we've extended the dropdown menu for duration in new interview booking

Description

In the new interview booking workflow we've added the following values to the dropdown:

- 15 minutes
- 45 minutes
- 75 minutes
- 105 minutes

Extra merge fields for new interview booking templates

Purpose and scope

Some recently added merge fields for the old interview booking templates were missing in the new interview booking templates and have now been added there as well.

Description

The following merge fields have been added to the new interview booking templates:

- Department address (under header Department)
- Contact person email (under header Vacancy)
- Contact person mobile (under header Vacancy)
