Notice

5.10.2021

All information in this documentation may be changed without warning, and it does not represent an obligation on the part of the manufacturer.

All material in this documentation and the programs it concerns are protected by copyright legislation and the specially entered Agreement concerning usage rights and maintenance. All rights to this material are the property of Visma Software International AS. Any copying or duplication of the material in this document, including but without limitations, text, screen appearance, icons, or methods, is prohibited.

As a part of its continuous development of the system, Visma Software International AS may change the composition of packages, modules and functions. Visma Software International AS waives any responsibility for any errors or omissions in the system, apart from what is clearly described in the current Agreement on usage rights and maintenance. Use of the system on other computers than the system it is licensed for is illegal and will be reported to the police and compensation will be claimed.

Introduction

This document includes information about new and changed features, fixed issues, and known issues and limitations in the latest version of Visma.net ERP.

We recommend that you read through the document so that you are familiar with the changes that have been made in this version before you start using it.

Please note that this document refers to the UK English version of Visma.net ERP.

General

General deliveries

Message displayed in UI when system maintenance is requested

If a company is set to maintenance job in the future, a message for this will be shown in the UI right next to the search element.

Due dates for breaking changes

release notes.	documentation	Due
Breaking change on Currency endpoint	The PUT, POST and GET v1/currency/ExchangeRates methods are deprecated and will be removed on November 16th 2021. Start using the new methods under v2/currencyRate.	Nov 16, 2021
Breaking change on GeneralLedgerTransactions	To improve the performance of GeneralLedgerTransactions endpoint, there are now three new flags to allow users to retrieve extended data only if necessary: expandBranchInfo, expandAccountInfo, includeTransactionBalance. To ensure the API compatibility, the flags were set to True by default but they will be switched to False by November 16th 2021. Please verify swagger documentation and if you consider the extended data is necessary, set the flags to True for your calls.	Nov 16, 2021

Message on changes in critical branch information

Visma.net ERP will start to broadcast a message whenever there is a change in critical branch information, such as organisation number, name, ID, etc. This message would be picked up by other integrated assets to show the branch level details. This does not affect any existing end user functionality and runs in the background.
